So you are thinking of becoming a pilot?

Whether you want to a career in aviation or you want to fly for fun, having your pilot's license is exciting and rewarding.

I knew I wanted to be a pilot at very young age. My dad was an Aerospace Engineer and I remember how excited I got when he would bring home left over parts used in making aircraft, the space shuttle and rockets. I would also stare up at the sky and dream of the day I would be able to actually fly an airplane. That day finally came in March of '96 when I was only 15 years old. After taking that first flight I was hooked and my journey to get my pilot's license began. Here we are over 15 years since my first flight and my fascination and passion for flying is as strong as it ever was.

After getting my Private Pilot's license I wanted a more in depth knowledge of aviation so I got a Bachelor's of Science degree in Aeronautical Science from Utah Valley University and graduated with a 3.7 gpa. I chose to become a flight instructor because I knew it would make me a better pilot and as an instructor I can help people turn those childhood dreams into a reality.

If you are ready to start your own journey into the exciting world of aviation I would love to help guide you along, sharing my passion for aviation. I have been a member of the Long Beach Flying Club since 2004 and I have worked as one of the dispatchers since the beginning of 2010. In this time I have met many of our students that come from all over the world and I know how intimidating it can be to come to a new place where you don't know anyone. I will make it as easy and comfortable for you as I can so you can focus on your goals and dreams of becoming a pilot. As your CFI my first priority is safety and I will strive to train you to become the best pilot you can be.

So....are you ready for flight? When you are, please give me a call or e-mail me and we can start you on your adventure. Thanks again for your interest and I look forward to flying with you.
